

Arduino Gravity Analog pH Sensor / Meter Sample Code

Revised 6/20

After flashing the Arduino with the code below, open the serial monitor and set it to append **carriage return** only and then set the baud rate to **9600**.

Arduino Uno

Arduino Mega

[Click here to download the sample code](#)

Then, follow the instructions on the next page.

Step 1

Download zipped library file, either from the cover page or by clicking [HERE](#).

Step 2

Move the *Atlas_gravity.zip* file to: **Program Files(x86) > Arduino > Libraries**

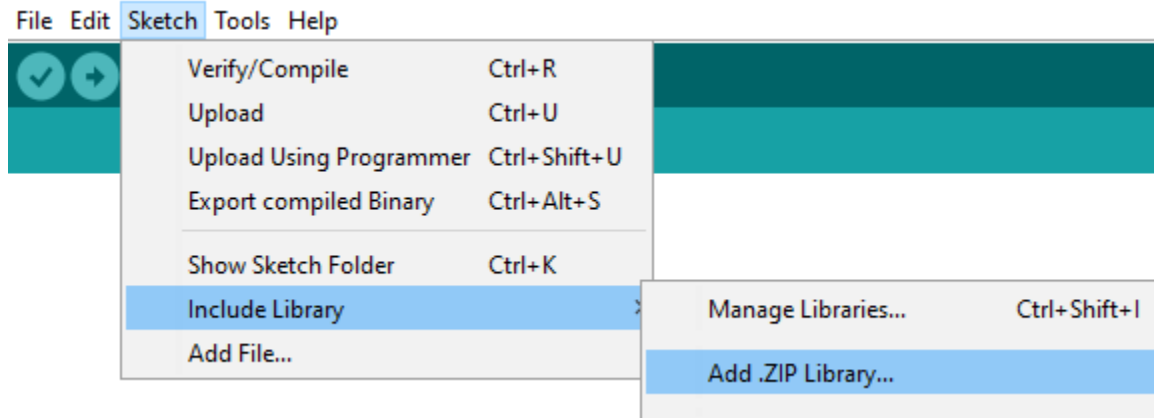

Name	Date modified
 Atlas_gravity.zip	6/3/2019 11:02 AM
 .keep	3/15/2019 3:16 PM

Step 3

Open the Arduino IDE software.

In the Arduino IDE, navigate to **Sketch > Include Library > Add .ZIP Library**.

At the top of the drop-down list, select the option to "Add .ZIP Library".

Step 4

Select "Atlas_gravity.zip" The Library file has now been installed.

**If you get an error message that says "A library named Atlas_gravity already exists", delete the old Atlas_gravity folder and zip file, then replace with the new *.zip file. and repeat step 3.

Step 5

In the Arduino IDE load the sample code.

File > Examples > Atlas_gravity > Examples > pH_grav_example
